📍 Hanoi, Vietnam

INTRODUCTION

Entry-level Fullstack Developer with practical experience building full-stack web applications, specializing in backend development. Solid foundation in RESTful APIs, database design, authentication, performance optimization, AI integration, with the ability to contribute across the full application stack. Seeking an opportunity to contribute to production-quality software while continuing to grow as a software engineer.

SKILL

- **Backend:** Spring Boot, RESTful API, Spring Security, JWT Authentication, Spring Data
- **Frontend:** ReactJS, Angular, TailwindCSS, Bootstrap, Thymeleaf, HTML/CSS/Javascript
- **Database:** MySQL, SQL Server, PostgreSQL, Firebase
- **Testing:** JUnit, Mockito, Testcontainer
- **Others:** OOP, Git, Docker, Maven, Postman, CI/CD
- **Foreign Language:** English (B2 / Upper-Intermediate)

EXPERIENCE

FPT Software Academy - Java Trainee (5/2025 - 8/2025)

- Completed an intensive, enterprise-standard software development training program.
- Building a simulated web project applying knowledge of Spring Framework and Database Design.
- Collaborated effectively with fellow trainees in a simulated Agile environment, utilizing Git/GitHub for source code version control and Jira for task tracking and sprint planning.

EDUCATION

FPT UNIVERSITY

- GPA: **3.2 / 4.0**
- Bachelor of **Software Engineering**

PERSONAL PROJECT

ITSeek - IT Recruitment and Job Search Platform (5/2026 - 8/2026)

Role: Fullstack Developer (5 members)

Tech Stack: Java 21, Spring Boot 3.5, Spring Security (OAuth2/JWT), Spring Data JPA, Spring AI (Gemini), PostgreSQL (pgvector), Angular 21, TypeScript, Tailwind CSS 4, Docker, JUnit 5, Testcontainers, k6

- Diagnosed and resolved N+1 query bottlenecks across multiple high-traffic listing APIs using Hibernate batch fetching and connection-pool tuning, reducing job-listing p95 latency from ~880 ms to ~197 ms under local load testing.
- Owned the CV & candidate journey module end-to-end (Spring Boot + Angular), delivering a template-based CV builder, server-side PDF/DOCX generation, AI resume parsing, and an AI mock interview with deterministic evidence-based answer scoring.
- Designed a deterministic weighted-feature recommendation engine with recruiter-configurable ranking criteria, alongside hybrid semantic + keyword search powered by PostgreSQL pgvector embeddings.
- Built the project's testing infrastructure by setting up unit and integration testing with JUnit 5 and Testcontainers, and developed/executed k6 performance test suites for core platform workflows.
- Github: github.com/linhvodanh2004/sep490-itseek
